

CALWEST RAIN

J Stands Portable Water Fill Stations

J Stands are portable water loading stands used to quickly and easily fill water trucks and tanks, providing the convenience of a drive-through water filling station. J Stands are most frequently used on farms, ranches, construction sites, mines, quarries and industrial sites for dust suppression applications.

Smart and Functional Design

Our smart design makes the J Stand easy to use and durable for years of demanding use.

- The inverted "J" shape fills the base with water first for increased stability and safety
- Easily connects to a pump or fire hydrant with appropriate fittings
- J Stands come standard with groove inlet connection
- Available with pipe thread, hose thread, Camlock, Ringlock, flange, Bauer and other fittings

J Stand Features & Options

We offer three sizes and various options to meet a wide range of needs. Additionally, we can also build custom J Stands to meet unique customer requirements.

- **Sizes:** 4", 6", or 8" diameter pipe
- **Height:** 11' from ground level to bottom of the spout
- **Base:** 7' X 7' diameter
- **Outlet Spout:** 7' from riser
- **Height Extension Kits:** Optional 3' or 5' height extensions create a total height of 14' or 16'
- **Warranty:** One year Limited Warranty on materials and workmanship

Durable Materials

With years of experience, we only use materials that have proven to be durable and long-lasting in demanding conditions.

- Heavy-duty aluminum pipe with .072" wall thickness on 4" Models and .083" wall thickness on 6" and 8" Models
- Schedule 40 fittings
- High-quality welding
