CalWest Rain

J Stands

Portable Water Fill Stations

J Stands are portable water loading stands used to quickly and easily fill water trucks and tanks, providing the convenience of a drive-through water filling station. J Stands are most frequently used on farms, ranches, construction sites, mines, quarries and industrial sites for dust suppression applications.

Smart and Functional Design

Our smart design makes the J Stand easy to use and durable for years of demanding use.

- The inverted "J" shape fills the base with water first for increased stability and safety
- Easily connects to a pump or fire hydrant with appropriate fittings
- J Stands come standard with groove inlet connection
- Available with pipe thread, hose thread, Camlock, Ringlock, flange, Bauer and other fittings

J Stand Features & Options

We offer three sizes and various options to meet a wide range of needs. Additionally, we can also build custom J Stands to meet unique customer requirements.

- **Sizes**: 4″, 6″, or 8″ diameter pipe
- **Spout Height**: 10′ 4″ to 11′ 0″ depending on the J Stand size and the height may vary +/- 2″
- **Base**: 7′ X 7′ diameter
- **Outlet Spout**: 7′ from vertical riser
- **Spout Sock**: 3′ section of 8.5″ 10mil poly-pipe
- **Height Extension Kits**: Optional 3′ or 5′ height extensions create a total height of 14′ or 16′ (+/- 2″)
- **Warranty**: One year Limited Warranty on materials and workmanship

Durable Materials

We only use materials proven to be durable and long-lasting in demanding conditions.

- Heavy-duty aluminum pipe with .072″ wall thickness on 4″ models and .083″ wall thickness on 6″ and 8″ models
- Schedule 40 fittings
- High-quality welding
